

Job Title: Web Services Software Engineer

Job Overview:

We are looking for an experienced web services developer to extend existing web services and build entirely new ones to support our own products and the needs of our clients. You will be responsible for taking a feature from scalable design, through implementation and testing, to release and support, using a combination of web technologies. Must be able to perform in a fast paced environment under pressure.

Job Description:

Plans, conducts, and coordinates software development activities. Designs, develops, documents, tests, and debugs software that contains logical and mathematical solutions to business/mission problems or questions in computer language for solutions by means of data processing equipment. Applies the appropriate standards, processes, procedures, and tools throughout the development life cycle. Applies knowledge of computer hardware and software, subject matter to be programmed in business/mission applications, information processing techniques used, and information gathered from system users to develop software. Corrects program errors, prepares operating instructions, compiles documentation of program development, and analyzes system capabilities to resolve questions of program intent, output requirements, input data acquisition, programming techniques, and controls. Ensures software standards are met.

Required skills:

1. Secret clearance (Candidate must be U.S. citizen able to obtain a DoD Secret level security clearance).
2. Bachelor's degree in related discipline
3. 2-5 years of general web services/architecture experience OR a recent college graduate with exceptional skills. (there will be NO on the job training)
4. 1+ years of experience with HTML/CSS
5. 1+ years of experience with WSDL (Web Services Description Language)
6. Experience with Java
7. Applied knowledge of code design theory and best practices
8. Attention to detail, compliance with defined processes, and the ability to function as a part of a larger effort are crucial.
9. Deadline driven and focused on contract deliverables, accepts demanding tasking while remaining flexible in order to work in an environment of changing priorities and direction.
10. Works well with a diverse and dynamic team in a high energy environment of subject matter experts, and systems engineers.
11. Ability to quickly learn and apply new technologies
12. Team player that takes ownership and develops relationships with the team members which fosters team success.
13. Task driven and proactive self-starter who can work on their own with very little oversight.

Desired skills include:

1. Experience with the following: GWT, Ozone Web Framework (OWF), Apache Maven, SOAP, RDBS/SQL, Apache Struts, Ruby on Rails, Hadoop, Tomcat and Jetty
2. Problem resolution skills
3. Strong communication skills
4. Perform in a fast paced environment under pressure.
5. Google Web Tool (GWT) Kit Master
